

ALBORAN GREY

Technical Details

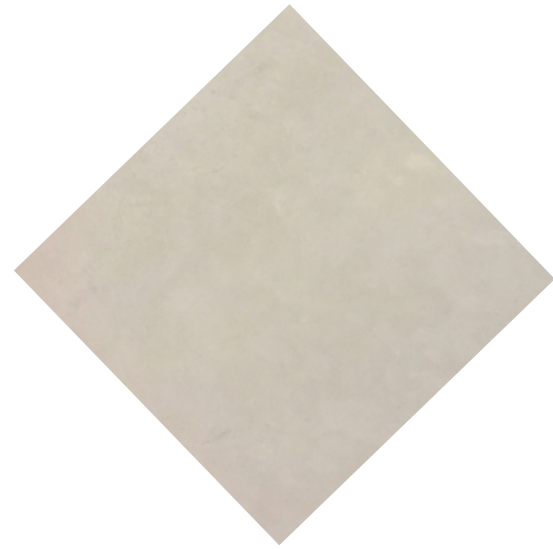

ALBORAN GREY

Alboran Grey is a dolomitic grey limestone. The mink grey color of its base contains small black particles distributed in an atomized way over the entire surface. From the chromatic point of view, it presents a high homogeneity.

The grey tones and the differences in granulometry that alternate within Alboran Grey bring the aesthetics close to concrete. Two types of appearances coexist in this natural stone: in some sections, it is smooth virtually without particles, and in others, it houses grains of different sizes.

Architects and interior designers use it in both exterior and interior wall and floor coverings. It is common to discover Alboran Grey in luxury hotels and large villas.

TINO Natural Stone offers Alborán Gray limestone in the finishes Polished, Honed, Domus and Sandblasted. Check the maximum size per finish. For other finishes, check availability and sizes.

MECHANICAL PHYSICAL PROPERTIES

PROPERTIRES	STANDARD	VALUE
Water Absortion	UNE EN 13755	2,5%
Flexural Strenght	UNE EN 12372	12,4 Mpa
Abrasion Resistance	UNE EN 14157	23,5 mm
Bulk Density	UNE EN 1936	2,47 g/cm3

SIZES

Sizes can be adapted to each project requirements. Standard thickness is 2cm and maximum size for this thickness is 240x140cm. For other thickness check available sizes.

Dimensional tolerance limits according to standards UNE-EN 12058 and UNE-EN 1341.

Standard surface finishes are:

POLISHED

HONED

DOMUS

SANDBLASTED

RECOMMENDED USES

	RESIDENTIAL	COMMERCIAL
Indoor Cladding	✓	✓
Outdoor Cladding	✓	✓
Indoor Flooring	✓	CHECK
Outdoor Flooring	✓	CHECK
Countertops	CHECK	CHECK
Others	CHECK	CHECK

PLEASE CHECK: Use could be permitted, it will be necessary more details.

Tino Group has completed
more than 600 projects with
clients from around the world.
