

SEQUOIA BROWN

Technical Details

SEQUOIA BROWN

Sequoia Brown is a crystalline brown marble. It has a remarkable striated appearance due to the marked bands it contains in brown, earth and grey tones.

The particular morphology of this natural stone sculpts a beautiful pattern of curved forms and its surface evokes the millenary trunks of the great American sequoias.

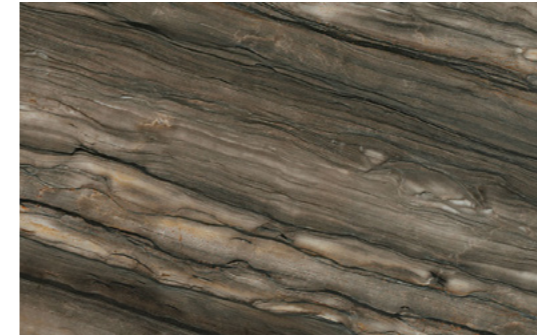

Architects and interior designers use Sequoia Brown for distinctly genuine interior and exterior cladding, including it in their large luxury hotel and residential projects. This brown marble offers impressive results when dressing interiors, bathrooms and kitchens.

The TINO Natural Stone surface finish standards for Sequoia Brown marble are Polished, Honed, Domus and Sandblasted. Check the maximum size per finish. For other finishes, check availability and sizes.

MECHANICAL PHYSICAL PROPERTIES

PROPERTY	STANDARD	VALUE
Water absorption	UNE EN 13755	0,11%
Flexural strength	UNE EN 12372	11.3 Mpa
Bulk density	UNE EN 1936	2.7 g/cm ³
Compressive strength	UNE EN 1926	92 Mpa

Technical information included in this document has been obtained from one or several standardized tests. Values may vary in later tests due to natural stone variation, as it is a product obtained from nature.

SIZES

Sizes can be adapted to each project requirements. Standard thickness is 2cm and maximum size for this thickness is 240x140cm. For other thickness check available sizes.

Dimensional tolerance limits according to standards UNE-EN 12058 and UNE-EN 1341.

Standard surface finishes are:  **POLISHED**  **HONED**  **DOMUS**  **SANDBLASTED**
