

MILANO WHITE

Technical Details

MILANO WHITE

Milano White is a white dolomite marble. It presents a beautiful bone-colored base with some very light grey colored glazes. The blackish veins are thick, and some thin lines of ochre or brownish color also appear occasionally.

The morphology of this magnificent natural stone is of the breached type. The set of breccias is formed by the union of two different geological formations. It is precisely its origin by having been fragmented and later embedded in another stone that generates its extravagant beauty.

The Milano White marble looks impressive in large-format interior projects, although it can also be applied in exteriors. It is highly demanded by architects and interior designers when dressing premium villas and luxury hotel chains. It can be found in refined bathrooms, kitchen countertops, and outstanding walls of immense dimensions.

SIZES

Sizes can be adapted to each project requirements. Standard thickness is 2cm and maximum size for this thickness is 240x140cm. For other thickness check available sizes.

Dimensional tolerance limits according to standards UNE-EN 12058 and UNE-EN 1341.

Standard surface finishes are:  **POLISHED**  **HONED**  **DOMUS**  **SANDBLASTED**

MECHANICAL PHYSICAL PROPERTIES

PROPERTY	STANDARD	VALUE
Water Absorption	UNE EN 13755	0,5%
Flexural Strength	UNE EN 12372	Value
Bulk Density	UNE EN 1936	2,07 g/cm ³
Open Porosity	UNE EN 1936	0,94%
