

SKY BLUE

Technical Details

SKY BLUE

Sky Blue is an impressive pale blue quartzite. Its appearance is reminiscent of a splendid blue sky interspersed with fluffy white clouds, as its name suggests. This natural stone's base shuffles different soft blues such as blue lavender, pale blue, and pastel indigo.

The veins that run across the surface are thick and white and bring light and expressiveness to the composition. Occasionally, some subtle light gray veins or small ochre nebulae can also appear.

From an aesthetic point of view, this inimitable quartzite brings a serene beauty to any space. In addition, from a functional perspective, it possesses a high level of quartzite resistance, being a perfect candidate to dress large-format interior coverings and high-quality custom-made countertops.

SIZES

Sizes can be adapted to each project requirements. Standard thickness is 2cm and maximum size for this thickness is 240x140cm. For other thickness check available sizes.

Dimensional tolerance limits according to standards UNE-EN 12058 and UNE-EN 1341.

Standard surface finishes are:  **POLISHED**  **HONED**  **DOMUS**  **SANDBLASTED**

MECHANICAL PHYSICAL PROPERTIES

PROPERTIES	STANDARD	VALUE
Water Absorption	UNE EN 13755	0.05%
Flexural Strength	UNE EN 1926	Valor Medio
Compressive strength	UNE EN 1936	108 MPa
Bulk Density	UNE EN 1926	2900 kg/m ³
